

The Airis Process

1. Qualifying Survey

2. Client Sign On

3. Technical Survey

4. Installation

5. Benefits

The Airis Process

Step 1 - Qualifying Survey

Our energy consultant will attend your premises to assess the viability of meeting the scheme criteria.

Step 2 - Client Sign on

If the scheme criteria is met then an initial agreement is made between the parties, pending the technical survey.

Step 3 - Technical Survey

Our project team will attend the premises to ensure the electrical installation is feasible

Step 4 - Installation

Full installation of Airis LED lighting.

Step 5 - Benefits

Time for the client to realise the benefits of the new installation:

- Reduction in Carbon Emissions
- Safer working environment
- Reduction in electricity spend.

Frequently Asked Questions

Who pays Airis?

You the client. This payment will always be less the savings you make on your electricity bill.

Will the installation have a warranty?

Yes, all Airis Energy installations come with a 5 year full maintenance guarantee.

Will Airis take over our electricity supply?

No, Airis will however provide you with access to their network of broker prices when

you are ready to enter a new electricity contract.

Is there any 3rd party involved?

No Airis are a single supply chain solution. Supply / Manufacture / Install / Finance / Warranty.

What happens after the 5 years?

You receive the full benefit of the savings generated by the lighting. Also Airis can offer extended warranties if required.
