

Solar.

**A cost neutral path toward your
zero carbon goals!**

www.airisuk.com 01253 283050 info@airisuk.com

Our solution

Zero upfront payments required

Airis Energy solutions funds the entire upfront cost of planning, designing, installing, and operating your Solar photovoltaic panels, so there is **NO RISK TO YOU**.

One single ongoing service fee

Service model frees up cashflow that you would otherwise have spent on the entire project, while our fixed monthly repayments enable you to plan spending without the shock of significant unexpected bills

Total turnkey project management

Once you are happy to proceed with our proposal, we take care of everything else, including the installation of your new solar panels around a timescale that best suits your business

Significant carbon footprint reduction

Solar panels are much more environmentally sustainable source of energy for your business, providing a significant reduction in fossil fuel usage which in turn reduces your company's overall carbon footprint.

Our package includes

- Assessment of existing energy requirements on site and professional recommendation on suitable panel types.
- Expected financial returns
- Supply and installation of commercial scale solar panels
- Access to our cloud-based monitoring platform
- Testing and commissioning
- Assistance with planning and structural permissions.
- Data collection and reporting

How does it work?

The process is simple and hassle free!

PLAN

We conduct a thorough audit of your premises to identify the existing available power supply on site.

DESIGN

We collaborate with you to create a bespoke solution according to your needs which is modular, scalable and futureproof.

INSTALL

We project manage the entire installation of your solar panels at a time that best suits your business.

OPERATE

We provide product warranties for all equipment.

PV System Case Study

DHL Express Panama

Our client DHL Panama wanted to capitalise on the vast rooftop space along with the abundance of geographical sunlight. The investment made by our client saw dramatic reductions in energy savings which in fact, exceeded all expectations making Airis a proud supplier of Solar Solutions to DHL Panama.
